

AI StoryBook

[Logo] ## Illustrate your imaginations to others

The Problem

- ▶ Teen manga fans and writers wait 1 week to 1 month per illustrated chapter.
- ▶ Manual creation is slow, costly, and requires professional skills.
- ▶ DIY AI tools lack fixed style and long-range character/story consistency.

Our Solution

- ▶ {'One-click ranobe-to-manga': 'generate 5–20 pages per chapter in minutes.'}
- ▶ Long-range character and plot consistency across chapters and runs.
- ▶ Fixed, reusable style packs and story-structure control.
- ▶ Built-in paneling, speech bubbles, and right-to-left layout.

Demo 1: Shadow Slave (Manga Style)

Input

Text: "A frail-looking young man with pale skin and dark circles..."

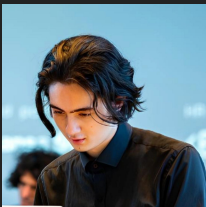

Image:

Output

Demo 2: The Boy and the Magic Van (Children's Book)

Input

Text: "Misi found an old, blue van in a dusty, cobweb-filled garage..."

Image:

Output

Market Opportunity

- ▶ **TAM:** \$16–20B (Global B2C creators/fans + B2B small publishers)
- ▶ **SAM:** \$1.5–2.5B
- ▶ **SOM:** \$40–60M (3-yr reachable)

Business Model

- ▶ {'Pay-per-chapter': '\$2.99 (5 pages), \$9.99 (20 pages).'}
▶ Marketplace for style packs and publisher revenue sharing/licensing.

Roadmap

Short Term

Public beta, 10+ styles, 20-page chapters, EN JP translation.

Long Term

Style marketplace, exports, publisher API pilots, early video/animations.

Meet the Team

Abdulazizbek Gainazarov - Data Scientist

Work at WizzAir, Bachelor's Degree in CS.

Bálint Décsi - Data Engineer

Work at Deutsche Telekom IT Solutions HU, Master's degree in Data Science for ML.

The Ask

\$15k in API or GPU credits, publisher intros, legal regulations advice.

Thank You!

Let's build the future of storytelling together.
