

AI StoryBook

Illustrate your imaginations to others

01

AI StoryBook

- Tired of **waiting** for new chapters? **Continue** on your own!
- **One-click** turns light novels into **consistent, styled** manga.
- MVP live: **5-page** chapters from **1k–1.5k** words in **~5 minutes**.

The Problem

01

Teen manga fans/writers wait 1 week–1 month per illustrated chapter

02

Manual creation is slow, costly, and requires pro skills

03

DIY AI tools lack fixed style and long-range character/story consistency.

Our Solution + Demo

- One-click ranobe-to-manga: generate 5–20 pages per chapter in minutes.
- Built-in paneling, speech bubbles, right-to-left layout, EN translation.
- Sample pages: in QR

04

Product Features

- **Style packs** with consistent look; **multi-chapter** character continuity.
- Upload **your images** with text to **align style** or inject characters—make the **hero look like you**.
- **Panel layout** engine, speech bubbles, chapter structuring, **export formats**.

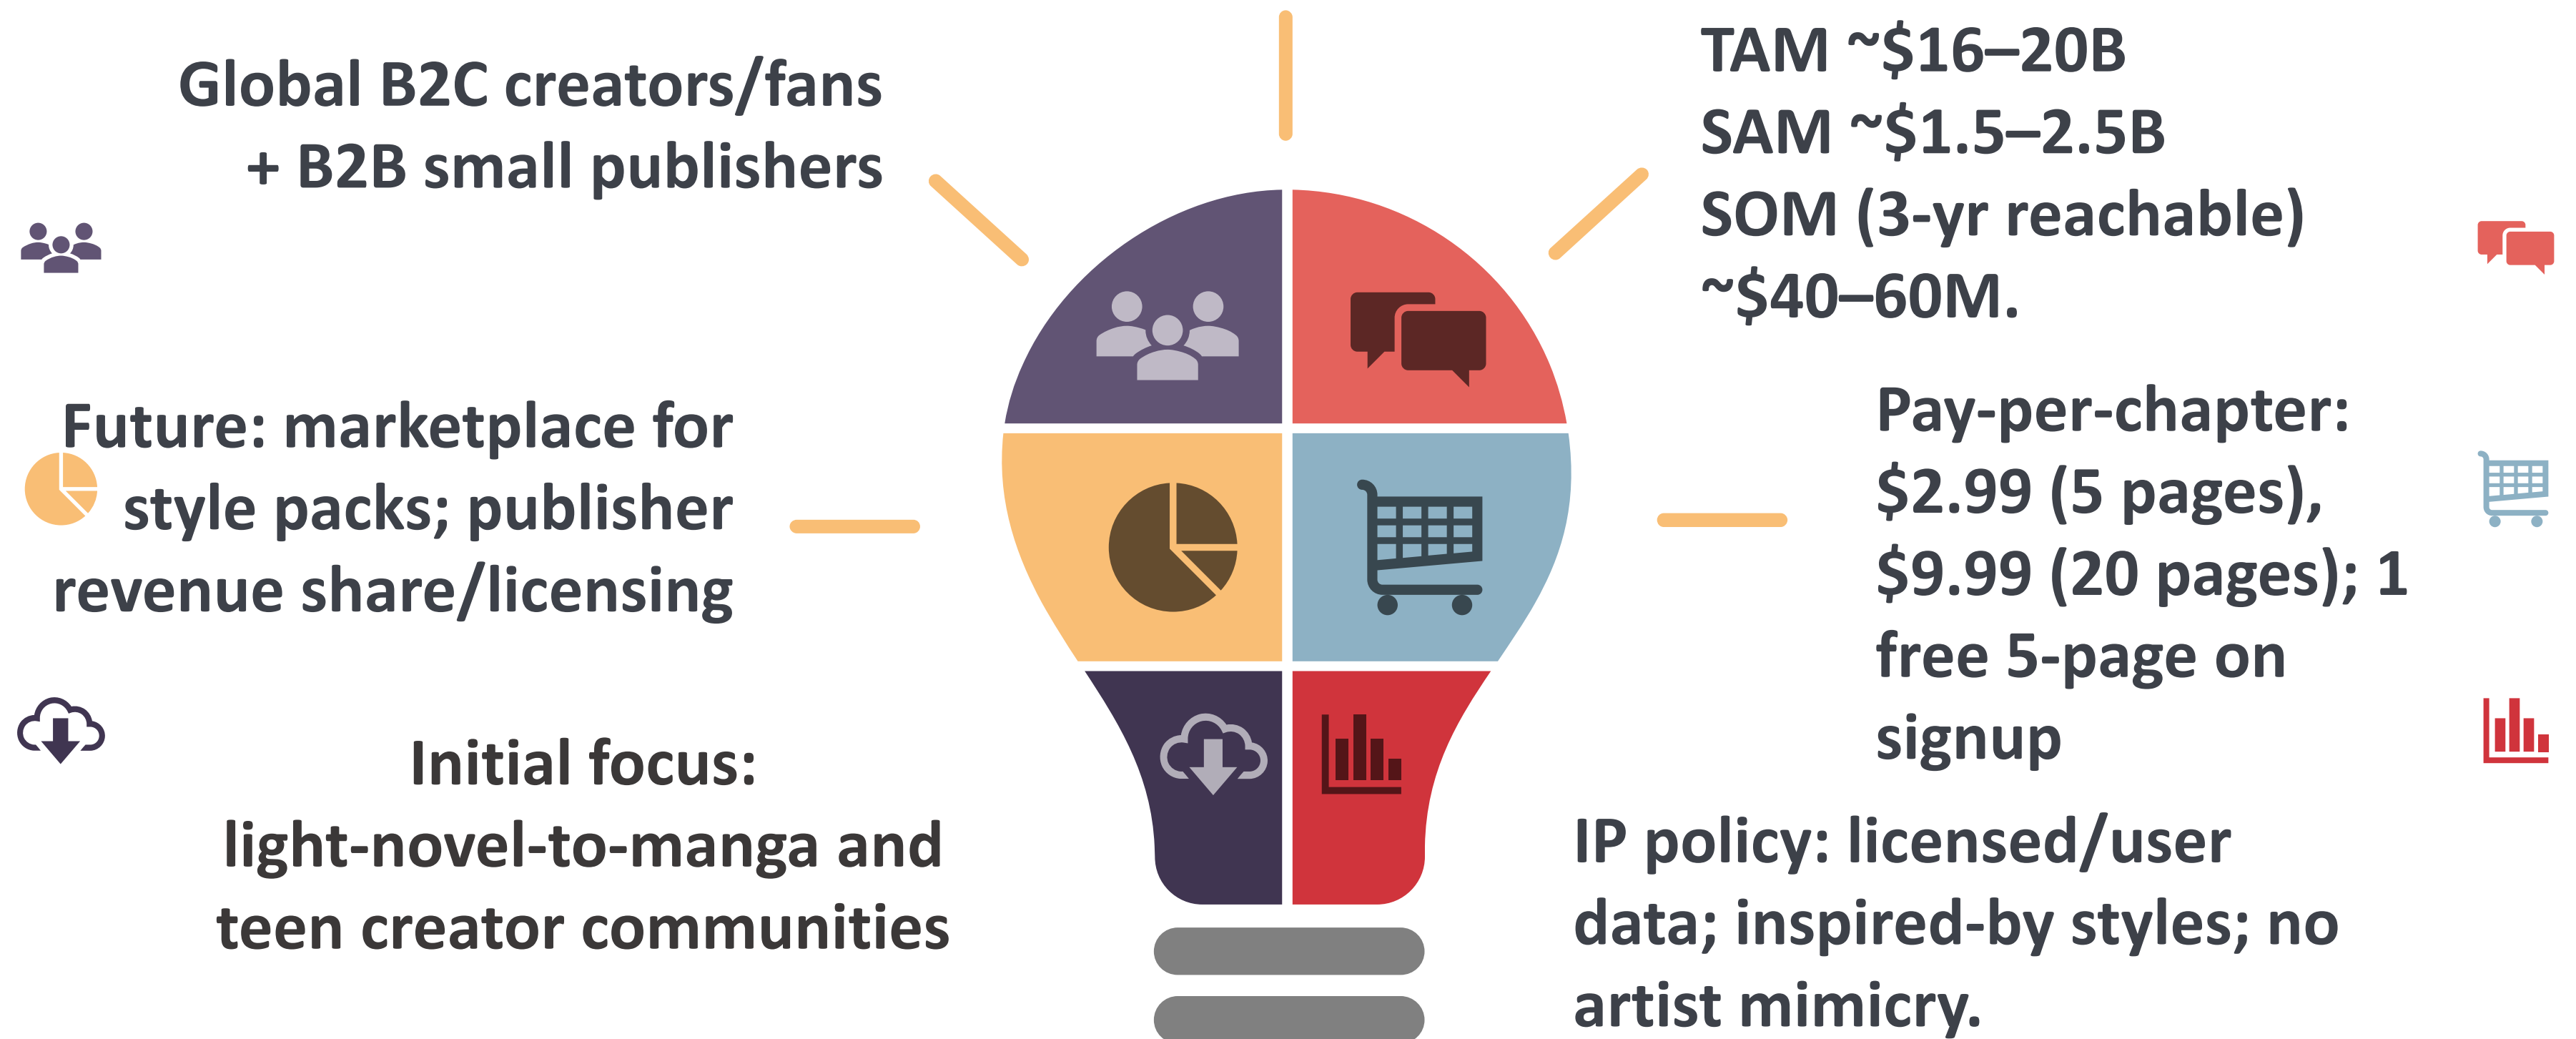

05

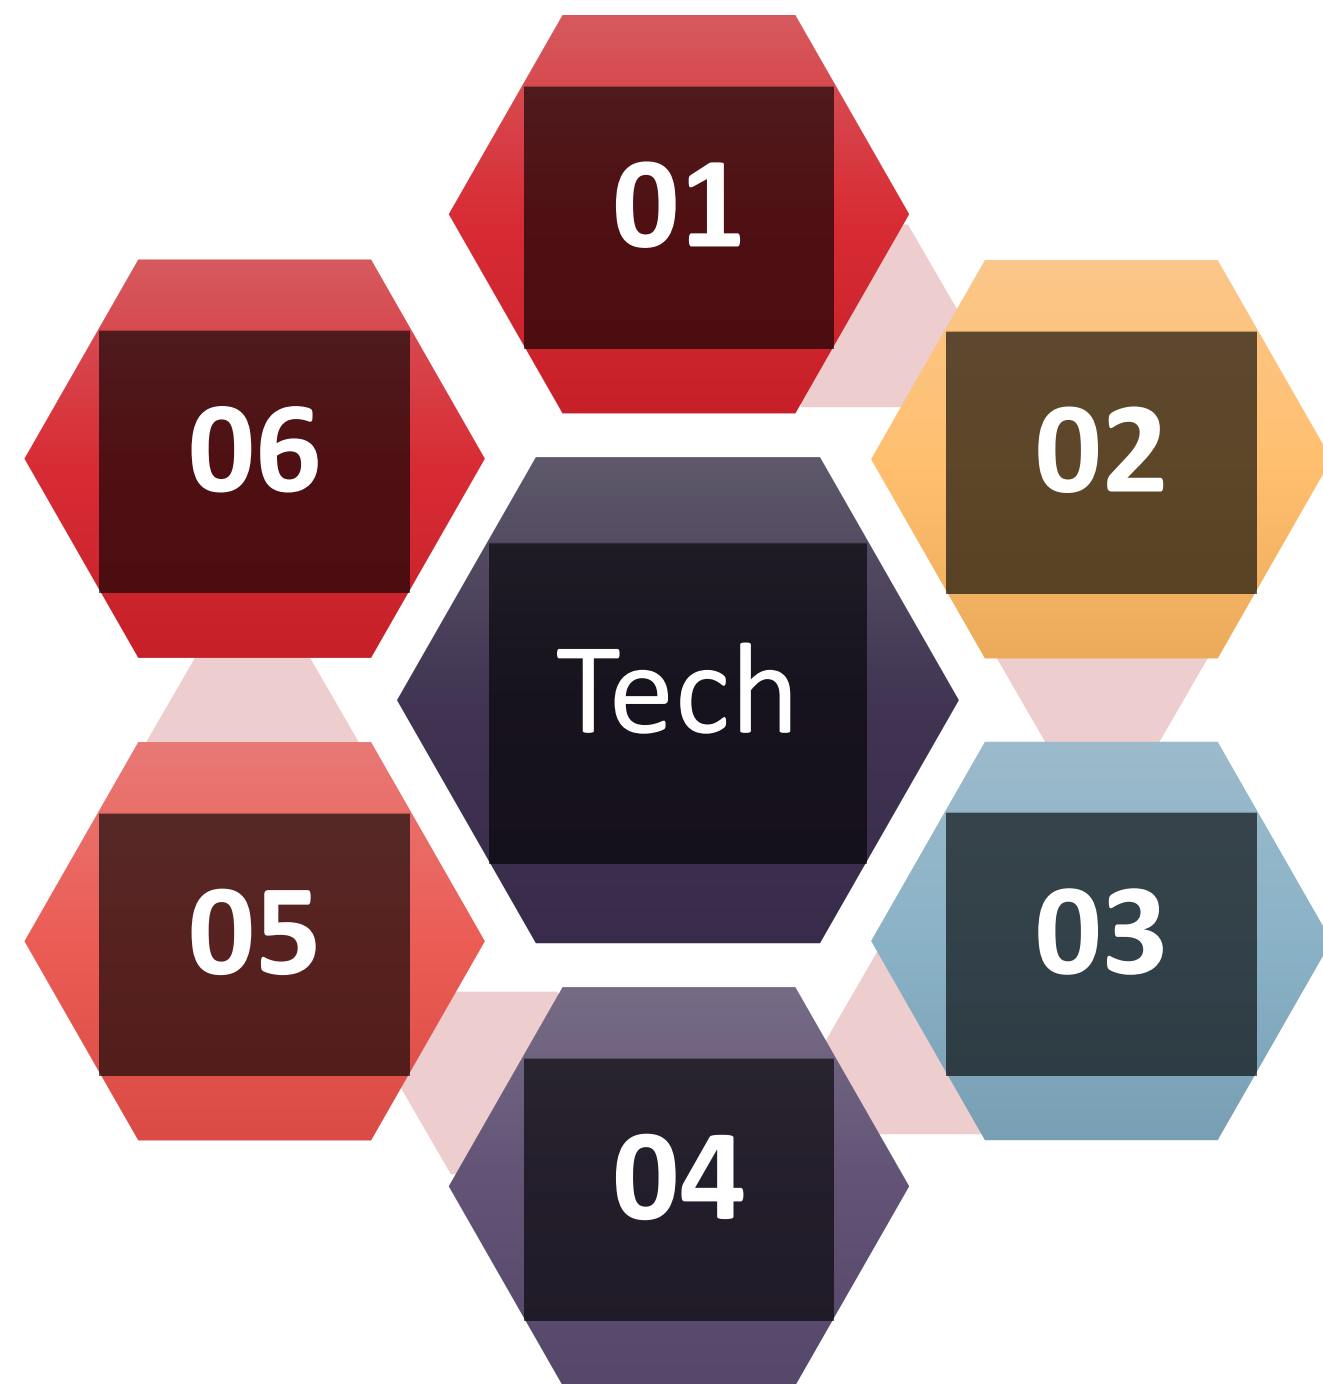

Innovation: Why We Win

- Long-range character and plot consistency across chapters and runs.
- Fixed, reusable style packs and story-structure control.
- Cost/time: ~5 minutes vs weeks;
~\$4/20 pages now → ~\$0.04/20 pages with local GPUs.

Market Opportunity & Business Model & Pricing

Scalability

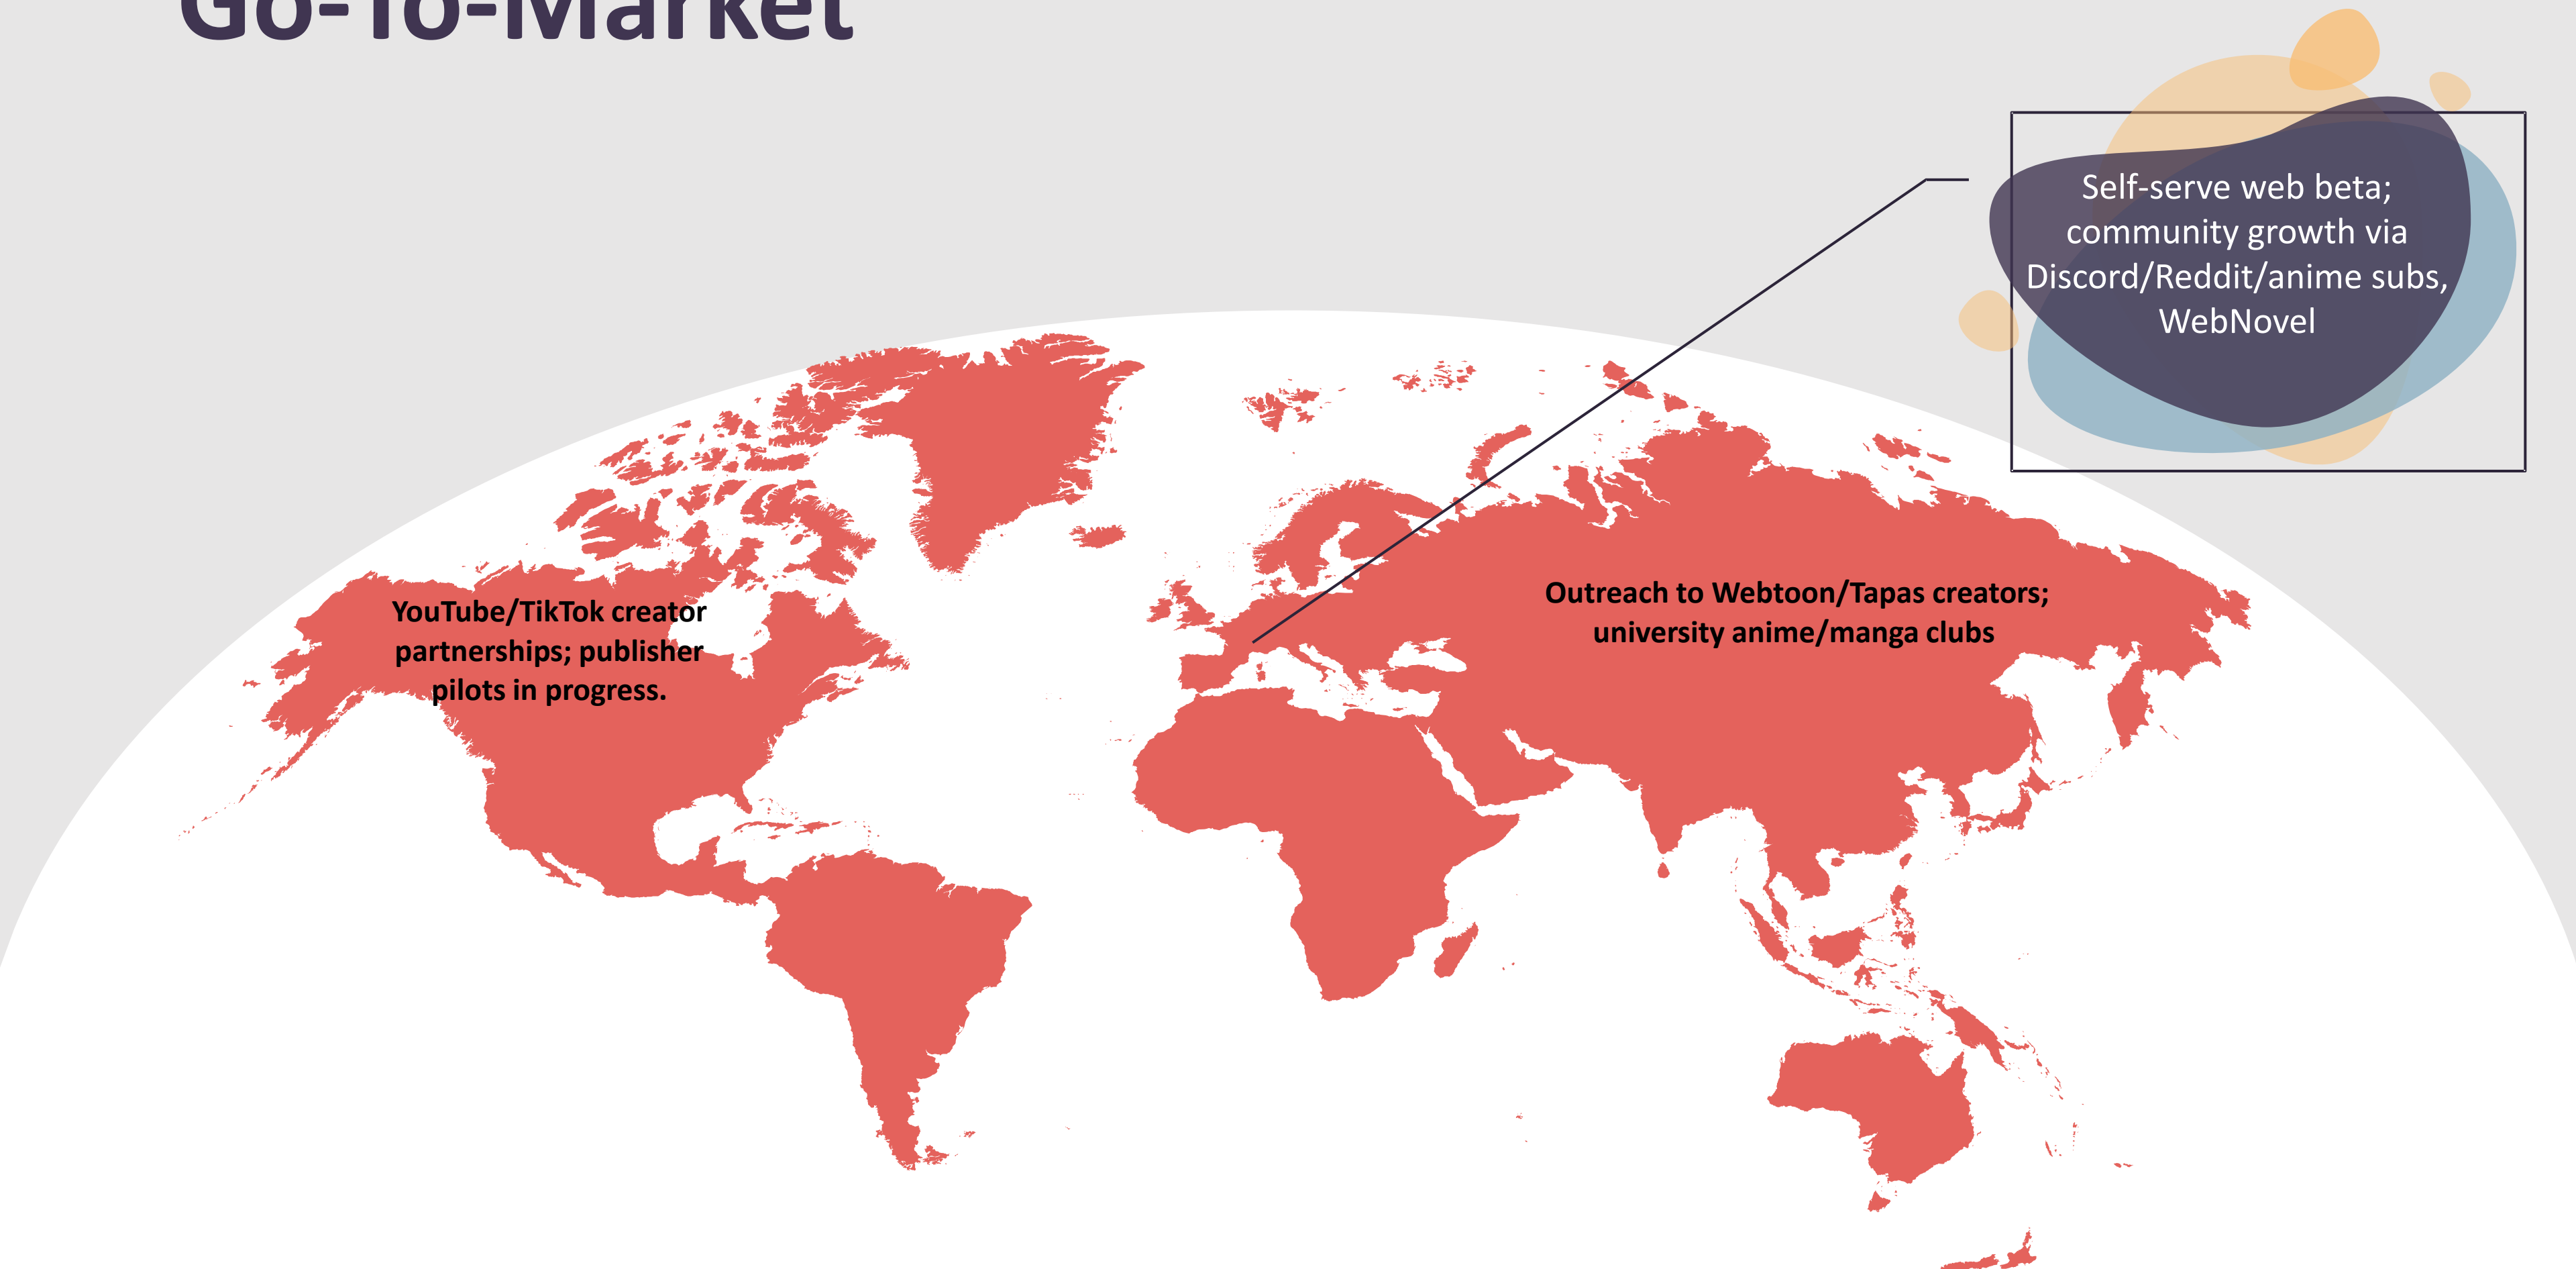

- Fine-tuned Autoregressive Transformers/LoRA style packs, character embeddings, retrieval for continuity; layout & speech engine.
- Today via OpenAI/Google APIs; switchable to local GPUs when available.
- Costs: ~\$1 per 5 pages now (~\$4/20p) → ~\$0.04/20p; partner API in ~6 months.

Go-To-Market

**YouTube/TikTok creator
partnerships; publisher
pilots in progress.**

**Outreach to Webtoon/Tapas creators;
university anime/manga clubs**

**Self-serve web beta;
community growth via
Discord/Reddit/anime subs,
WebNovel**

Competition & Differentiation

	Chapter	Consistency	Styles	Bulk
GenAI + manual (comicsmaker.ai, leonardo.ai, Midjourney, NovelAI)	30 min	Yes	Yes	No
Storybook engines (Gemini, storywizard.ai)	1 min	No	No	Yes
Full GenAI (loremachine.ai, OpenAI Image)	15 min	Yes	Yes	No
AI StoryBook	5 min	Yes	Yes	Yes

- **Competitors:**
 - GenAI + manual:** for artists and publishers, takes **long** to create chapter, but good quality.
 - Storybook engines:** no manga **styling**, text **not embedded** to image.
 - Full GenAI:** One by **one page** generation, which makes creation **longer**. No solution for **bulk** generation
- **Differentiators:** long-term character/story consistency; fixed style packs; 5–10 chapters/run; speed and cost.

Traction & Team

- **Abdulazizbek Gainazarov** – Data Scientist:
 - Work at WizzAir
 - Education: Bachelor's Degree, Computer Science
- **Bálint Décsi** – Data Engineer:
 - Work: Deutsche Telekom IT Solutions HU
 - Education: [Master's degree, Data science for machine learning](#)
- **MVP:**
 - Supports 1 manga style + basic children's storybooks;
 - 20 chapters generated;
 - Waitlist 20; pilots in progress.
 - Demo: sample PDF linked;
 - Public web beta 1 month
 - More styles and 10k-word runs this year

Roadmap, Results & Ask

- 0–6 mo: Public beta, 10+ styles, 20-page chapters, 10k-word runs, EN↔JP;
- 6–24 mo: style marketplace, exports, publisher API pilots; visual-novel builder, early video/animations.
- Outcomes:
Y1 ~1,500 paying creators, ~5 publisher pilots, ARR ~\$300k;
Y2 ~6,000/15, ~\$1.6M;
Y3 ~20,000/40, ~\$6M.
- What we need: \$15k in API or GPU credits, publisher intros, legal regulations advice;

THANK **Y**OU!

Hope you like this pitch :)
